

Pathway Light

New for 2012, the Pathway Light casts a flat beam of light in two directions for marina walkways and general land based pathways.

Made from die cast stainless steel this light is designed for many applications including marina walkways, driveways, parks and anywhere an illumination is required with out glare. The pathway light throws a flat wide beam of light to produce accent lighting and safety lighting to areas where pedestrian traffic is likely. Colours can be mixed i.e. For a path it can be white on the path side and green on the lawn side. Also available in white and blue combination for marina's. Combination can be customized.

Technical Specifications

- 12V AC / DC
- 2 year warranty
- Current draw less than .2 of an amp @ 12 v
- Reverse polarity protected
- Low cost install
